

## MODE OF DELIVERY RELATED INDICATORS

**Definition:** For a population of women and year: the number of births associated with each of the following modes: Vaginal, spontaneous / Vaginal: instrumental forceps, ventouse / Caesarean (CS) : before or at onset of labour(elective) / Caesarean: during labour (emergency), as a proportion of all still and live births.

Computed by parity, previous caesarean section, plurality and gestational age.

**Table 1: Total births by mode of delivery**

Year	Total Births	Number of total births - Mode of Delivery						Percentage of total births - Mode of Delivery					
		Vaginal - spontaneous	Vaginal - instrumental*	Total Vaginal	CS before labour	CS during labour	Total CS	Vaginal - non-instrumental	Vaginal - instrumental	Total Vaginal	CS before labour	CS during labour	Total CS
