Re: Deletion of Prednisone Acetate 30mg Suppositories

Please be informed that due to problematic sourcing, prednisone acetate 30mg suppositories have been deleted from the Government Formulary List.

As an alternative, prednisolone 5mg soluble tablets are available on the Government Formulary List. These can be prescribed through Schedule V entitlement by Consultant Paediatricians. Prednisolone 5mg soluble tablets are not protocol regulated.

For your information please.
