

The Multicultural Working Group

We are a group of diverse individuals that aim for integration of foreigners and migrants within the Maltese community. Malta is becoming increasingly global, as people are migrating to the island from all over the world. Ensuring that such migrants are fitting into the Maltese society is priority.

We are trained to work with people from different backgrounds to respect their values whilst ensuring their integration within the community.

Accessibility to health, legal, financial and educational services as well as other important aspects of life is vital to ensure a holistic inclusion into society.

Following the training programme 'Cultural Mediators in Health Care' which was delivered by the Migrant Health Liaison Office within the Primary Health Care Department we have recently been working on accessibility to health care where we

have offered support, cultural education and interpretation services at Mater Dei Hospital and Floriana Health Centre to assist foreign service users and health professionals during clinical encounters.

This service facilitates communication and the understanding of cultural differences that service providers within the public service come across in their daily work.
